DETAILED ACTION

1. Claims 1-7 have been examined. Application 09/788,302 (INTEGRATED FREQUENCY AND AWARD REDEMPTION PROGRAM FOR INSTALLMENT BASED RECEIVABLES BEHAVIOR MODIFICATION AND CUSTOMER LOYALTY MANAGEMENT) has a filing date 02/15/01.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shkedy (U.S. 6,260,024) in view of Early Payments and further in view of Storey (U.S. 6,578,012).

As per claim 1, Shkedy teaches:

A method for implementing an on-line incentive program for members who are making installment payments, said method comprising the steps of:

providing an Internet webpage accessible to at least a member, via a computer system, for on-line interactive communications between said member and said Internet webpage (see column 12, lines 35-67; column 20, lines 4-45);

offering, on said Internet webpage, installment payment schedule information to said member (see column 20, lines 4-45);

Shkedy fails to teach:

determining whether said member qualifies for one or more award points based on said member making one or more timely installment payment; calculating said award points according to a preprogrammed formula if said member qualifies for said award points and issuing said award points to an account of the member if the member qualifies for said award points, wherein said award points are redeemable by the member for an award. However, the article Early payment teaches about a system that gives customers a 2% discount for paying on-time and a year-end cash rebate after 12 months of on-time payment (see paragraph 2-3). Storey teaches about an online system that permits users to manage awards points and redeem the points online (see column 2, lines 1-35). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the application was made, to know that users would use the system described in Shkedy to set up an online installment payment plan and if the users pay their bills on-time, they would receive awards or rebates. Users would use the Storey system to manage the awards points or rebates accumulated by paying their bills online. With these features, billing companies would have a higher probability to receive their payments on-time, saving the expense of trying to make customers pay, and the customers would receive an extra incentive for paying on-time. Therefore, both entities would benefit from the incentive award system.

As per claim 2, Shkedy teaches:

A method for implementing an on-line incentive program for members who are making installment payments as recited in claim 1, said method further comprising the step of offering, on said Internet webpage, electronic installment payment capability to said member (see column 12, lines 35-67; column 20, lines 4-45).

As per claim 3, Shkedy teaches:

A method for redeeming incentive awards in an on-line incentive program, said method comprising the steps of:

implementing an Internet webpage accessible, via a computer system, to at least one member of said on-line incentive program for on-line interactive communications between said member and said Internet webpage (see column 12, lines 35-67; column 20, lines 4-45);

Shkedy fails to teach:

implementing an on-line incentive program that issues award points to members who are making installment payments, wherein said award points are redeemable by said members for an award; offering, accessible from or on said Internet webpage, at least one redeemable award available to said member for exchange of said award points; and permitting said member to initiate a process to receive said at least one redeemable award for exchange of said award points issued to said member through said on-line incentive program. However, the article Early payment teaches a system that gives customers a 2% discount for paying on-time and after 12 months of on-time payment, a year-end cash rebate (see paragraph 2-3). Storey teaches an online system that permits users to manage awards points and redeem the points online (see column 2, lines 1-35). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the application was made, to know that users would use the system described in Shkedy to set up an online installment payment plan and if the users pay their bills on-time, they would receive awards or rebates. Users would use the Storey system to manage the awards points or rebates accumulated by paying their bills online. With these features, billing companies would have a higher probability to receive their payments on-time, saving the expense of trying to make customers pay, and the customers would receive an extra incentive for paying on-time. Therefore, both entities would benefit from the incentive award system.

Claim 4 contains the same limitation as claim 1 therefore the same rejection is applied.

Claim 5 contains the same limitation as claim 2 therefore the same rejection is applied.

Claim 6 contains the same limitation as claim 3 therefore the same rejection is applied.

Claim 7 contains the same limitation as claim 1 therefore the same rejection is applied.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Statusfactory.com teaches a system designed to help consumers pay their bills online.
